

MUSIC TO THE EARS
FOUNDATION™

Thank you for your interest in MUSIC to the Ears.

MUSIC = Musicians Using their Skills to Inspire Children

Why We Exist:

Many children today never get the chance of experiencing music programs in the California school system. In many communities, music education is given very little support, if any at all and because of statewide budget cuts; music programs have been stripped of funding or completely cut. Music education programs that incorporate digital instruments and current music genres will have a direct impact and appeal to students. Our goal is to fill this void.

About Us:

We are a Los Angeles California based non-profit organization dedicated to providing music education, workshops, seminars, panels and training to students of all ages through the use of analog, digital and electronic instruments and equipment.

Our History:

MUSIC to the Ears has operated and grown organically over the past 10 years, operating without grants or major funding. We are expanding our responsibilities, roles and services to reach a greater audience. With this expansion comes a greater need for support through volunteers, strategic partners and corporate sponsors.

Below are our 2015 goals and initiatives. We appreciate your help and support.

- Music Afterschool Programs
- DJ & MUSIC Academy
- Free Summer Concert

How You Can Help:

We need people who believe in our cause and mission to help in the following ways:

- Volunteer: We need skilled specialists to provide expertise, advice, services and time.
Products: We need DJ, Production and Audio equipment, accessories and gifts.
Financial: We need private and public funding through donations, partners and sponsors.
